MEDIA RELEASE

APA continues safety focus, connecting Queensland and NSW

APA Group (ASX: APA) continues to implement programs designed to ensure the safety and reliability of Directlink, a 63 km high-voltage direct current electricity interconnector linking Queensland and New South Wales.

The recently published Directlink 2024-25 Electricity Network Safety Management System (ENSMS) annual performance report outlines safety performance across its transmission network for the prior 12 months. Through its ENSMS Directlink is committed to the safety of members of the public and those working on the network.

APA Group Executive Operations Petrea Bradford said the safety of our people and the community is our top priority.

"Directlink plays an important role in facilitating the transfer of energy between Queensland and New South Wales and continues to build safety awareness through a range of engagement and public awareness programs and campaigns," Ms Bradford said.

"These programs align with our focus on ensuring we operate assets that are safe and reliable for our customers, landholders and the broader community."

About APA Group (APA)

APA is a leading Australian Securities Exchange (ASX) listed energy infrastructure business. We own and/or manage and operate a diverse, $27 billion portfolio of gas, electricity, solar and wind assets. Consistent with our purpose to strengthen communities through responsible energy, we deliver approximately half of the nation's gas usage and connect Victoria with South Australia, Tasmania with Victoria and New South Wales with Queensland through our investments in electricity transmission assets. We also own and operate renewable power generation assets in Australia, with wind and solar projects across the country. APA Infrastructure Limited is a wholly owned subsidiary of APA Infrastructure Trust and is the borrowing entity of APA Group. For more information visit APA's website, apa.com.au
